

Block cutting & Grating Machine

F-600S

Block cut and grate in the same time!

Under processing is not required,
it will greatly up your work efficiency.

【 Applications: Block cutting and grating radishes 】

- There is no need for interim storage place for under processing.
- Fully yield is chieved because of no coarse ends!
- Hygienically cutting foodstuff into certain length and to grate at the same time.

- Accessory: 1pc of grating drum
- Option of coarseness: fine,medium,coarse and extra coarse
Able to grate variety coarseness by changed grating drum only.

- Dimensions : W1000 × L700 × H710 (mm)
- Motor : Three phase 200V 3700W with inverter (for Japan) *1
- Weight : 30kg
- Operating time : Continuous use
- Processing capacity : 600 ~ 1000kg/h
- Coarseness for your choice: Fine,medium,coarse and extra coarse
- Exterior: SUS304 stainless steel
- Operating time : Safety device: Circuit breaks by sensor detection

User: Factory of vegetable
processing,food processing.

The grated performance like a
handmade. (extra coarse)

It can be done for completely coarse grated radish
confined tightly flavor and moisture to the grain of crispy.
Also, taste and texture can be changed by changing the
drum's coarseness, make more adds-value to the grated
radish.

Insertion slot
(1 slot type)

Rotating plate
※ The high-speed
rotation plate with
a block-cutter.Rub
the radish to the
grating-drum.

Super Grating Machine

DX-660

No need sorting! 100% yield!

【 Applications: Grating 】

- Vegetables are grated by strong centrifugal force.
- Just only put vegetables in the machine.
- No need to push them.
- Gingers,garlic and wasabi(Japanese horseradish)
can be grated easily.

- Accessory: 1pc of grating drum (coarseness is selectable from the
choices as follow.
- Optional: Grating drums (for fine,medium,coarse or extra coarse)
By changing the drum, various grating size could be done.

- Dimensions : W500 × L490 × H780 (mm)
- Insertion slot: 80mm ※ customise are available
- Motor : Three phase 200V 1500W (for Japan) *1
- Weight : 40kg
- Operating time : Continuous use
- Processing capacity : 100 ~ 300kg/h
- Exterior: SUS304 stainless steel

User: Factory of making pickles,
vegetable processing, center kitchen.

効

Choices of grating drums

Extra fine Fine Medium Coarse Extra coarse

Non-standard carrot in high value-
added products "carrot juice"

Using DX-660 to grate
as such the non-standard
apples which could not
be sold to the super
markets, it will reborn to
be a nutrient-rich as a
high value-added juice
products.

Sample of vegetable available

- ※ The onion which is difficulty to grate also can be
grated.
- ※ If want to grate the wild yam, F-600,DX-66 be
recommended.

Insertion slot

Rotating plate
※ Ultra speed turning
plate rub the foodstuff
on the drum then grate.

Multi Slicer (Specification for factory)

DX-1000

【 Applications: Slicing,cutting into strips and garnish 】

- Ultra-pulling cut by the planetary motion of round blade.
- Freshness is preserved due to the very clear cut surface.
- Sanitary and highly durable stainless steel body.

- Accessory: Round blade sharpener
- If you select a type for slicing: Only the slicing disk is included.
- If you select a type for cutting into thin strips: Both the slicing
disk and the disk for cutting into thin strips are included.

- Dimensions : W340 × L560 × H500 (mm)
- Motor : Single phase 100V 100W (for Japan) *1
- Weight : 20kg
- Operating time : Continuous use
- Processing capacity : 50 ~ 100kg/h
- Cut size : Available for slicing 1.0 ~ 10.0mm
※ 5.0 ~ 10.0mm is customise made.
for thin strips : 3.0 × 3.0mm (standard size)
※ Thickness: maximum to 3.0mm
- ※ Width of comb blade: Customise from 1.2mm are available.
- Exterior: SUS304 stainless steel
- Safety device: Circuit breaks by sensor detection
- User: Factory of convenience store,vegetable processing,bread & cake, bento.

- ※ When ordering, please choose one of an insertion slot type you need.
- ※ After purchasing the slicing type, if the thin strips cutting is also needed, julienne disk have to purchased in optional.
- ※ If you select a type for cutting into thin strips: The slicing disk is included.(However, sliced thickness adjustment of washer and collar be required.)
- ※ When ordering, please let us know your choice or certain foodstuff's cut size and process.

Insertion slot for diagonal cut

φ 41 (25°, 30°, 35°, 40°), φ 60 (30°), φ 83 (30°)

Slicing
type

Best for making
ingredients of
sandwiches. The
cover for semi-
circular slicing is
also available.

Insertion slot for slicing
(Wide slot for changing slantwise)

φ 83 (30°), φ 60 (30°)

Slicing
type

Slicing leeks
diagonally

Even very tender
strawberries can
be cut cleanly!

Insertion slot for cutting
into round slices

φ 72, φ 100

Slicing
type

Lemons and green peppers
can be cut easily.

耐

Wide slot for
charging bent
cucumbers

With the wide insertion slot of this machine, bent
cucumbers that are difficult to process can be
cut cleanly. The cucumbers will turn into value-
added products simply by cutting. In addition, an
increase in yield can be achieved by eliminating
the loss of foods. Also, it is easy to keep this
machine clean and sanitary. Thus, this is an
environmental-friendly eco-machine.

Vertical 2/3/4/6/8 pieces Cut Machine

F-V2/V3/V4/V6/V8

【 Applications: Vertical 2/3/4/6/8pieces Cut 】

For cutting carrots,cucumbers,lemons,eggplants,potatoes,tomatoes,
pickles,peaches,paprika,taro,sausages,king trumpet mushroom etc.

- Foodstuff be pulled and cut evenly by round blades.
- Only DREMAX can cut vertical to 6 pcs and 8 pcs!

- Dimensions : W760 × L760 × H1360 (mm)
- Motor : Three phase 200V 25W x 2,3,4,6,8 (for Japan) *1
- Weight : 45 ~ 80kg (depend on numbers of motor)
- Operating time : Continuous use
- Processing capacity : 300 ~ 500kg/h
- Exterior: SUS304 stainless steel
- Safety device: Circuit breaks by sensor detection
- Cut diameter: Max φ 85 (using φ 100 round blade)
Max φ 115 (using φ 135 round blade)
※ Diameter of insertion slot: Depending on food stuff's size

User: Factory of making pickles,vegetable processing.

2010 Kawaguchi City Incentive Scheme
Promoting New Product Development
Winning a bounty for the In-air Cutter for
Substandard Raw Peaches for F-Series.

Develop new products from the
substandard size peaches!

The in-air cutter for substandard
raw peaches, one of the F-Series
machines, can cut peaches that fail to
meet the standards due to bruises and
shapes together with stones. Thus,
this machine achieved the new use
of foods that has been discarded for
fruit jellies. Rotating round saw blades set from all quarters
in the shape of a cross, machine cuts the dropping peach.
Because the peach is only thrown in, not being put on the
table, there is no excessive pressure and work efficiency
significantly increases.

Round blade

太

stick

- ※ Cutting size less than 2mm could not be manufactured.
- ※ Only for cutting thin strips and rectangles. Not available for slicing.
- ※ Basically machine is made in fixed size. Sending back the machine to our factory for repairing
the size have be required in case of you want to change the cut size after purchase.
- ※ If it is frequently the cut size exchange, we recommend the DX-800W.
- ※ Please contact us for more information about the size exchange.
